

Figure 1: Population pyramid Ireland 1926–2002

An example of using `animate.sty` for empirical data: a population pyramid over time.

Click on controls to play the animation in full, step forward and back etc.

The animation should work in reasonably recent versions of adobe acrobat reader.

Data is from Central Statistics Office (CSO) Census of Ireland, various years. Note that intercensal periods are 5 or 10 years.

This working example uses the latex package (`animate`) which can be found at:

<http://www.ctan.org/tex-archive/macros/latex/contrib/animate/>
